APPLICATION FOR PERMIT

TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

Date of filing in State Engineer's Office				
	rned to applicant for correction			
Corrected application filed				
Мар	NOV 1 4 1980			
Bal AFI	The applicant U.S. Government Listic Missile Office CE-MX, Norton Air Force Base of San Bernardino Street and No. or P.O. Box No. City or Town			
	Street and No. or P.O. Box No. ifornia 92409 State and Zip Code No. State and Zip Code No.			
wate	State and Zip Code No. ers of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorpora-			
	; if a copartnership or association, give names of members.)			
	, it a dopartitioning of association, give named of inclination.			
1.	The source of the proposed appropriation is underground Name of stream, lake or other source.			
2.	The amount of water applied for is			
	(a) If stored in reservoir give number of acre-feetacre-feet			
3.	The water to be used forQuasi-Municipal			
4.	If use is for:			
	(a) Irrigation (state number of acres to be irrigated)			
	(b) Stockwater (state number and kinds of animals to be watered)			
	(c) Other use (describe fully under "No. 12. Remarks")			
	(d) Power:			
	(1) Horsepower developed			
	(2) Point of return of water to stream.			
5.	The water is to be diverted from its source at the following point: NW of NE's of Unsurveyed Section 3			
	T.10N., R.67E., M.D.M.; and bearing N.33 03'W. 33,280 feet to the SE Corner Describe as being within a 40-acre subdivision of public survey, and by course and distance to a section corner. If on unsurveyed land,			
	of Section Section 36, T.11N., R.66E., M.D.M. it should be stated.			
6.	Place of use Spring Valley; includes only federally owned land as described in Describe by legal subdivision, if on unsurveyed land it should be so stated.			
	Exhibit "B"			
7.	Use will begin about January 1 and end about December 31, of each year. Month and Day Month and Day			
8.	Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and			
	specifications of your diversion or storage works.)Diverted through pipes for construction			
	purposes from a drilled well State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits.			

	Estimated cost of works
	Estimated time required to construct works. One (1) year
11.	Estimated time required to complete the application to beneficial useTwo (2) years
12.	Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use.
	See Attachment A for explanation of total annual quantity of ground water
	requested for the basin and its intended use.

Attachment

The attached application for the appropriation of ground water is for the purpose of supplying water for the construction and operational phases of the MX Missile System in Spring Valley. The attached application is one of five for appropriation of ground water in the valley. Each application is for 485 acrefeet per year of ground water resulting in a total quantity of 2425 acre-feet per year for the ground-water basin. This is a conservative figure and is greater than that which will lively be required annually during the construction period. The 2425 acre-feet are requested for only a one to two year construction period within a span of five years beginning in 1989, construction of roads and a pensible construction plant and camp are expected to commence about one year prior to shelter construction and will require less than one-fifth of the 2425 acre-feet figure. Ground water required for road construction is included in the 2425 acre-feet for shelter construction is included in the 2425 acre-feet for shelter construction. Following construction the operational ground-water use is expected to be less than 300 acre-feet per year. This reduced quantity of ground water will be needed for the life span of the system which will be approximately 20 years.

The ground water for construction will be used for road compaction, dust suppression, shelter construction, miscellaneous structures, and possibly construction plants and camps. Ground water for the operational phase will be used for maintenance and surveillance facilities personnel as well as other possible support systems.

The place of use of the ground-water, as indicated on the attached water rights survey map, covers the entire valley in anticipation of the probably broad areal extent of construction activities. It is possible that once the construction planning has been completed, a request may be filed to change the point of diversion on the attached application to a more strategic location, however, the above stated total quantity of ground water will remain the same.
